▶ Control Access ▶ Monitor Use

- Do you know who is using your equipment ?
- Are you able to prevent unauthorised access ?
- Have your operators been trained for the equipment they are operating ?
- Are your operators working within Safe Working Limits ?
- Are your operators complying with required rest periods ?

Robway's accountability solution gives you a way to control access to your equipment and ensure that it is being used safely.

Robway's Solution can

- ▲ Save lives
- ▲ Prevent equipment damage
- ▲ Avoid project delays and compensation claims
- ▲ Avoid equipment downtime
- ▲ Reduce maintenance costs and extend crane life
- ▲ Ensure statutory compliance
- ▲ Prevent damage to your reputation for reliability and safety

Robway's accountability solutions 'Saves Lives and Protects your Equipment'

How It Works

- Operators receive a Operator ID Keyfob programmed with equipment or class of equipment they are authorized to operate.
- Keyfobs have a pre-programmed expiry date.
- The Keyfob reader is integrated into the control system. Keyfob and a unique 4-digit PIN code are required for login.
- Unauthorized Operators are prevented from operating machinery.
- Operators log-off when they have finished using equipment.
- All log-ins attempts are logged and stored electronically and records can be remotely reported to a web server.

Features and Benefits

- Systems are installed and operational on mobile cranes, shipyard and harbour level luffers, container cranes, tower cranes, gantry cranes, excavators, offshort pedestal cranes, telehandlers and winches.
- System conforms to recognised international standards and statutory requirements
- Rugged, environmentally-tested system suitable for harsh environments, including temperature extremes, vibration and humidity.
- Integrated with operating controls and load safety systems.
- Remote monitoring and data logging with GPS data via 3G or other networks.
- Password-protected PC-based management software (MS Windows or Linux).
- Encryption and security measures prevent copying or unauthorized use of keyfobs.
- Worldwide support.

Accountability is Critically Important

Fatal consequences when operators push your equipment past safe working limits.

Downtime and delayed payment even when lives are not lost.

Damages and compensation (for delays to projects worth millions or billions) from contractors and clients.

Expensive equipment inoperable for a long time with repairs are costly.

Regulators will be crawling all over your company, and watching you for years afterwards.

Fines under OHS&W legislation, bad publicity and damaged reputation. Equipment life is reduced. Insurance and maintenance costs increase.

Robway's accountability solution enables you to control access to your equipment and ensure that it is being used safely.
